Summary

Full-stack backend-oriented engineer with 13 years of experience. Deep expertise in the Java ecosystem, SQL, React, and TypeScript. Highly motivated, proactive, and delivery-oriented. My recent experiences include cloud-native apps, DevOps, monitoring, and cloud.

Experience

Workiva, Senior Backend Engineer

Ames, IA

At Workiva I'm working as a Fullstack Kotlin TypeScript engineer, in the core sustainability reporting team. Workiva is much well established, and has a mature internal tooling. My tasks usually includes refactoring, bugs, and troubleshooting.

Apr 2026 – present
6 months

- Upgraded Frameworks Content versions
- Refactored removing deprecated dependencies
- Improved part of the messaging system

Accela, Senior Backend Java Engineer

San Ramon, CA

At Accela I worked as a Senior Java engineer, leading discussions, agile ceremonies, code reviews, all kind of code tasks, and documentation. This position required a lot of communication and alignment with other teams, coordinating deployments, runbooks, and scripting. While there I worked in the platform and admin teams.

Oct 2024 – Apr 2026
1 year 7 months

- Diagnosed and resolved critical production bugs in REST/EJB services on WildFly
- Developed a Spring Boot microservice using Apache Camel, async processing and 3rd-party integration
- Implemented architectural and performance improvements in legacy Java codebases
- Provided technical guidance and unblocked teams across the organization
- Wrote comprehensive documentation for troubleshooting and deployment guides

Encora, Technical Lead

Campinas, Brazil - Remote

Led modernization efforts refactoring a legacy Oracle monolith with extensive PL/SQL stored procedures into microservices on RedHat OpenShift. Analyzed complex business logic across thousands of lines of code, collaborated with data teams on schema design, and delivered cloud-native services using Spring Boot and GraalVM. Built React frontends with GIS mapping capabilities. Managed CI/CD pipelines, conducted code reviews, and mentored team members while working in Scrum methodology.

Aug 2021 – Oct 2024
3 years 3 months

- Refactored legacy Oracle monolith (PL/SQL packages) into Spring Boot microservices
- Built cloud-native applications using GraalVM and deployed to RedHat OpenShift
- Developed React frontends with GIS integration (Leaflet, MapLibre, OpenMaps)
- Collaborated with data teams on PostgreSQL/Oracle schema design and migration
- Implemented OAuth2/JWT authentication with Keycloak
- Managed CI/CD pipelines and deployments using GitHub Actions
- Led sprint planning, task refinement, and provided technical mentorship
- Established observability using OpenSearch, Fluent Bit, and AWS Lambdas

Kugel, Software Engineer

Full-stack developer maintaining and evolving a comprehensive ERP system (manufacturing, CRM, billing, inventory, HR). Developed new features, custom requirements, and reports while providing direct customer support and training. Managed compliance with Brazilian government regulations and conducted on-site visits to gather feedback. Built desktop and web applications using Java/Swing and AngularJS, designed reports with Jasper, and deployed solutions through Jenkins and GitLab CI.

- Developed features and customizations for complete ERP system across multiple domains
- Provided direct customer support, training, and gathered requirements through regular on-site visits
- Built desktop applications using Java Swing and web interfaces with AngularJS
- Designed and integrated reports using Jasper Reports
- Maintained compliance with annual Brazilian government regulatory changes
- Developed internal productivity tools on own initiative
- Deployed solutions and managed CI/CD pipelines using Jenkins and GitLab
- Collaborated closely with end users to improve system usability and address pain points

Joinville, Brazil
Oct 2013 – Aug 2021
7 years 11 months

Education

Master's Degree, Computer Science

De- Cloud computing specialization with focus on distributed systems, containerization, gree security, and orchestration.

Joinville, Brazil
July 2023 – June 2024

Master of Technology - UDESC - State University of Santa Catarina, Computer Science

Comprehensive computer science education covering programming, algorithms, databases, and software engineering principles.

Joinville, Brazil
Jan 2011 – June 2015

Projects

TaskNote

Personal project build with Spring, GraalVM, and React to manage tasks and notes

remote
Jan 2022 – present

Bean Score

Personal project built with Quarkus, GraalVM, and React to rate coffee shops

remote
Mar 2025 – present

Skills

Programming Languages: Java, Kotlin, JavaScript, TypeScript, SQL

Frameworks & Tools: Spring Boot, Quarkus, Javalin, GraalVM, React, Docker, Keycloak, FusionAuth

Devops & Observability: Jenkins, GitHub Actions, Kubernetes, Prometheus, Grafana, Datadog, Splunk

Cloud Platforms: AWS, Azure, RedHat OpenShift
